KNOWLEDGE UPDATE

Case Brief on Pioneer Microinsurance

The Facility

The Facility has released its latest Case Brief, which covers the Philippines based insurer Pioneer. Our Case Briefs highlight successful innovation stories from the Facility's partners. Managing scale and a move to customer centricity form an important element in Pioneer's growth story. Click [here](#) to read more.

Paper: When and how should agricultural insurance be subsidized?

Peter Hazell, Panos Varangis and Rachel Sberro-Kessler

The Facility and GIIF have jointly published a paper entitled "When and how should agricultural insurance be subsidized?". The paper discusses agricultural insurance subsidy in detail and draws upon available literature and case study experiences to propose good practice guidelines for its design and implementation.

Emerging Insight: Bundling value into the agricultural value chain

The Facility

Bundling agriculture insurance with other services that form part of the agricultural value chain, like credit and farming inputs, is emerging as a solution to help make insurance more tangible, achieve better social outcomes and enable schemes to scale faster.

Emerging Insight: Why insurance failed to adequately support small business recovery in India

Mercy Corps and Okapi

Floods around the world often have disproportionately harmful impacts on low-income households and small businesses. Distribution models in some countries however do not always work in the interest of the client. The case of Chennai highlights the need for a responsible insurance agenda.

We are accepting applications until July 31 (midnight CEST)!

Housed at the International Labour Organization, the Impact Insurance Facility enables the insurance industry, governments, and their partners to realise the potential of insurance for social and economic development. The Facility was launched in 2008 with generous support from the Bill & Melinda Gates Foundation, and has received subsequent funding from several donors.
