Kadic Hospital [1]

About the Product(s)

Countries of Operation: Uganda
Product status: Active
Number of Members: The scheme had 6,000 members as of 2008.
Institutional Model: Community-based health insurance/mutuelle
Type of Coverage: Voluntary
Type of Policy: Individual + family policy
Provider of health services: Private providers

Kadic first established an in-house insurance programme to help patients finance health care at a time when most had no external source of insurance. The hospital is now developing relationships with external health insurance companies to begin replacing the in-house membership model.

Benefits and services covered: Hospitalization

Beneficiaries receive primarily inpatient benefits.

Premium Amount: 10% of hospital revenue is achieved through membership premiums.
Subsidy: No subsidy
However, some low-income benefits are cross-subsidized by higher income patients.
