

Type of Event: Webinar

Date: August 27, 2015

Venue: Online Event

Description:

The ILO's Impact Insurance Facility, together with the WBG's Global Index Insurance Facility, the USAID and BASIS/I4-sponsored Global Action Network (GAN), organised a webinar to look into the question "How can index insurance be bundled with other financial and non financial services". This webinar featured speakers from global organizations who shared experiences and discussed which services and activities in the agriculture value chain are most aligned for bundling. It explored mechanisms and issues in bundling, and also looked into the possible impact of bundling on pricing & off-take of index insurance and measures of tracking it.

The entire webinar can be rewatched [on our YouTube channel](#) ^[1]. You can access the slides of the webinar [through SlideShare](#) ^[2]. Panelists also took time to provide [additional inputs](#) ^[3], following questions asked in the webinar's Q&A session.
